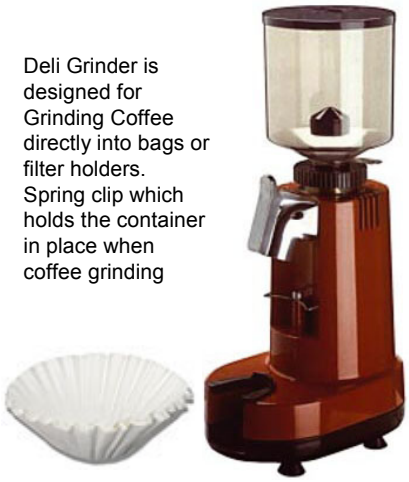
Power 240V 10amps 187watts **0.25 HP**
Dimensions: W 200mm x D 280mm x H 570mm - Weight 10Kg

RR45 DELI COFFEE GRINDER

Deli Grinder is designed for Grinding Coffee directly into bags or filter holders.
Spring clip which holds the container in place when coffee grinding



RR45 Coffee Grinder

Professional coffee grinder with flat grinder blades, micrometric adjusting device and automatic stop device.
Dosing adjusting device from 5 to 9 gram.

Doser Grinders
The doser grinder stores the ground coffee in a coffee chamber. This coffee chamber is divided into pie sliced shaped compartments, which are set to a certain dosage of ground coffee. Pulling the lever towards you will give you one dosage of ground coffee.
The doser grinders work very fast and are great for busy coffee environments. They are very easy to operate and reliable.
They are available in automatic or manual grind. The automatic starts the motor when ever the chamber is less that ½ full. This allows the dose to be more accurate and prevents partial fill of the filter basket.

RR55OD

On Demand grinder - How to programme

Press:
Single dose for 1 coffee
Double dose for 2 coffee

Programming

Press "+ and -" at the same time and turn on the machine
F.01= Single shot =
F.02= Double shot =

Press + to change and – to decrease
eg 4 is on the display press + and then press – to set to 2.7
F.01 will show again
Press – and you will see F.02

Counter

If you want to know how many Single or Double coffee's are dispensed go to programme mode as above and scroll down to C1 or C2
Ie C1 = 142 or C2 = 70 = 1 Kilo bag

When in programme mode as above Press " + " for 3 sec – This will reset the counter to 000

When over 999 cups are dispensed the **display starts to flash.**
5023 cups sold to date shows up as 005, 052, 502, 023

Code	Description	Default	Average	Your setting
