

AGUST have made their reputation supplying some of the finest restaurants and caffè in Northern Italy and Germany, and this is reflected in the quality of their products and service.

Espresso Coffee is CAFFE' AGUST great passion and perhaps their greatest field of expertise. They roasted the first espresso in 1956, and although they now use the most modern roasting equipment and packing methods, the aim remains exactly the same as it did 50 years ago; supply customers with the best espresso coffee available.

Passion for quality convinced CAFFE' AGUST to be one of the **CSC ITALIA**-promoters, which, thanks to **ISO 9002** certify procedures, ensures the high quality and consistency of the coffee.

CAFFE' AGUST BEANS

..buy beans from around the world such as Arabica beans from Colombia, Costa Rica, Brazil, Mexico and Ethiopia and Robusta washed beans from India and Kenya. When the coffee beans reaches Brescia (northern Part of Italy) the whole staff meets up for the selection rite. The beans are examined carefully, with no hurry... just like in the 19th century, when the "ancestors", expert merchants and connoisseurs, used to raise the fresh plants to the Brazilian sun to check their quality against the light.

EXPERIENCE AND QUALITY

The **choice of raw coffee** is fundamental for the final mixture's result.

For this reason the purchase of raw materials is still **completely made by the Agust's owners**, through frequent travels in original coffee countries, with direct and personal acquaintance of all suppliers.

Only **better qualities** are imported: in fact raw samples are **tested** before purchase is confirm.

Fifty years sector **experience** and continuous laboratory tests guarantee all of our blends **constancy** and **harmony**.

The lot that passes the exam is ready to be roasted. The rhythm of coffee: a connoisseur's ear for music!

Coffee talks: when the beans reach the right roasting temperature they crackle in the rotating drum which cuddles them. A good roaster can recognize the "voice" of coffee and interrupt the roasting at the right time.

CAFFE AGUST is one of 11 roasters in the world to have attained CSC Certification

(Certified Specialty coffee) and along with its **ISO 9002** ensures the highest quality of the product:

With CAFFE AGUST you have a very prestigious brand with the highest quality coffee in the world !

This amounts to unbeatable value for money!
