Jura Impressa X7-S Commercial Coffee Machine is capable enough to make 3 kinds of coffee including cappuccino and latte. The display system gives user-friendly instructions for the ease of operation. The decalcifying, cleaning and integrated rinsing functions makes maintenance a simple job

Simple operation

1 step cappuccino

Optional cup warmer

Makes 100 per day

DISPLAY DIALOG SYSTEM

The large display dialog system (2lines of 12 characters) provides simple user friendly operative information and its available in seven languages. Even complete beginners, find utilizing the IMPRESSA X 7Series an effortless and easy process.

ONE STEP CAPPUCCINO

The IMPRESSA X 7 features Maximum automation to prepare a Cappuccino or Latte. Press one single button and the machine both froths milk and brews Espresso and a delicious drink is ready to be served in an instant. All with fresh and natural ingredients: whole bean coffee and milk!

ADJUSTABLE COFFEE SPOUT

The height of the coffee spout for dispensing one or two cups of Espresso coffee or single Cappuccino, is easily adjustable from 3 to 6 inches. This allows you to adapt the spout to different cup sizes, e.g. an Irish coffee glass, always ensuring a clean machine and perfect cream.

SEPARATE HEATING SYSTEMS

A second separate heating system saves time and guarantees permanent steam availability, allowing you to prepare perfect Cappuccinos back-to-back. all day long.

INDIVIDUAL COFFEE

The IMPRESSA X 7 adapts to your needs - even the buttons can be changed and programmed to reflect your coffee menu,. Every product button is programmed in respect to the amount of coffee , water , milk, and brewing temperature desired.

GRINDERS

Two high performance precision conical grinders with separate bean containers give you the option to choose to use one of the two grinders for a single blend or to select a blend from both grinders. Programmable in increments of 25%.

PROGRAMMING PANEL

A flip down panel allows easy access to the programming buttons. Each program key can be quickly adapted to suit your taste in coffee. An external token acceptor or smart card reader are also available as an optional accessory.

MAINTENANCE PROGRAMS

The integrated cleaning, rinsing, and descaling program permits effortless upkeep, without any time consuming removal of the brewing unit. Large capacity water filters and water softeners are available in conjunction with the optional Aqua Kit installation to retard scale build up and enable a better tasting coffee.

OPTIONAL CUP WARMER

If your planning on using glass or china you should know a warm cup is really important when serving espresso drinks. The heat and space availability on top of these machines is minimal. A recommended optional cup warmer is available to keep your cups at proper temperature.
