

Self Serve – table top

Necta Colibri C3 SA

Colibri is the ideal solution for low volume self service locations.
The Colibri is manufactured by N&W Global Vending one of Europe's biggest vending machine manufacturing producers

Suits: Office, Showroom, B&B, Convenience store, Supermarket etc. that need up to 50 cups per day.

Small foot print!

8oz or 12oz Cups

Espresso

Strength coffee

Black Coffee

Cappuccino

White Coffee

Hot Chocolate

Hot water for tea

Café Mocha

The 'Colibri' bean to cup is able to make 5 kinds of coffee including Hot Chocolate and hot water for tea. The customer can even make their coffee stronger by pressing the 'strength button'. The display system gives user-friendly instructions for the ease of operation.

QUALITY

Thanks to the **Zanusso 2000M brewer unit**, Colibri can make an excellent espresso coffee with a long lasting crême and fuller body, compared to a traditional coffee machine.

In order to obtain drinks of a consistently high quality, starting from the first coffee, the unit is preset for the installation of a heater into the brewing chamber. This ensures an optimum extraction temperature and improves the appearance of the drink.

The Necta mixers produce instant drinks, using soluble products, which are of a consistently high standard. The dispensing cycles are designed to obtain the best possible results concerning drinks quality and output.

EASE OF USE

- Large buttons to make selections easier
- Simplified loading due to the top lift-up panel
- Plug-in systems and new technical solutions simplify cleaning and maintenance
- Easily accessible button for mixer cleaning

CLEANING

Made very straightforward due to the modular functional components that can be accessed directly from the front of the machine and are easy to remove. The drip tray and the coffee grounds container are also simple to remove – even by non-qualified personnel.

The new mixers have a built in powder suction drawer, which reduces the number of components, therefore, allowing them to be quickly removed for thorough cleaning.

FUNCTIONALITY

- Adjustment of doses with the highest accuracy
- Self-diagnosis for checking up machine failures
- Boiler temperature adjustment via programming
- 8-bit electronic control
- RS232 for the statistics of all selections
- The alphanumeric display makes the information for the user and the indication of failures easy and clear

CONFIGURATIONS

- Dispensing into the cup from a single point
- 7 selections + hot water
- Stainless steel adjustable support shelf
- Option of dispensing into small jugs
