

Viva S - GTV: make the perfect cappuccino, automatically!
Popular cappuccino & latte drinks can be served fast & to the highest standards due to the specially designed steam wand with: automatic foaming of milk & ready temperature cut out. Even a highly skilled Barista could not achieve perfect froth as easily or consistently as the GTV system.

As used in the barista championships

- **New GID Brewhead System (Direct Water Injection):** the boiler temperature can be set up to 125°C, for better steam performance. Thanks to the GID System, the coffee water is maintained at an optimal temperature
- **Magnetic pump:** silent and extended duration life.
- **Pre-programmed cleaning cycle**
- **Cappuccino frother** optional
Just turn the knob to release the dense & creamy froth.
- **Easy to maintain** all wearable parts are easy to get at
Quicker service means smaller bills
- **Stainless Steel**
S/S Legs, base, tray, panel, splash back ,cup warmer and steam wands
- **Pre-infusion**
Allows for 2 second soak which gives a more generous crema, body and flavour

VIVA S is a state of the art range of coffee machines which have built in microprocessor that ensure a perfect cup of coffee. Each espresso will be brewed at the same temperature no matter how many cups are made. VIVA have big boilers and pumps ! When you need to make lots of teas coffees or cappuccinos the VIVA . will not let you down.
